Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-4,6-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over prior art (figs. 1-3 of application) in view of Higashino et al. (US 6,433,456).

Regarding claims 1,6, and 11,Prior art discloses all the aspect of the claimed invention except for coil spans, intervals/widths between the slots, are different each other.

Higashino et al. disclose coil spans, intervals/widths between the slots, are different each other (see figs. 1 and 6).

Art Unit: 2834

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the stator of Prior art to accommodate with the the coils spans as taught by Higashino et al. in order to reduce noises of the motor.

Regarding claims 2, the proposal in combination of Prior art and Higashino disclose two adjacent coil spans of the slots are different each other.

Regarding claims 3 and 8, the proposal in combination of Prior art and Higashino disclose two adjacent coil spans in one direction are called as a pair of coil spans, the pairs of coil spans are formed as the same shape and the same size, and two coil spans constituting the pair of coil spans are different each other.

Regarding claims 4 and 9, the proposal in combination of Prior art and Higashino disclose a ratio between said two coil spans constituting the pair of coil spans is preferably 1.5:1 (see fig. 6, 36 degree to 24 degree).

Regarding claims 7, the proposal in combination of Prior art and Higashino disclose the slots have the same size and the same shape, and lengths and widths of the teeth formed between the slots are the same.

Allowable Subject Matter

4. Claims 5 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
